

I have been impressed by the phenomenal technology that has offered for the hard-of-hearing. However, the CapTel is the relay system that can ensure my needs are met and surpassed. I want the FCC to make this available in Kentucky. Because, I perceive that the CapTel is exemplified by the abundant opportunities that can accommodated the needs for my hearing. Furthermore, it would be an ideal to have CapTel to pursue my dreams and ambitions to become a better person. It goes above and beyond the call of understanding to ensure that this CapTel become useful for the hard-of-hearing. The reason for having the CapTel can be a benefits last a lifetime. Make this available for the people that are hard-of-hearing in Kentucky.
